

■ Ghar Se Mobile Photography & Video Guide for Sellers

Yeh guide un beginners ke liye hai jo sirf mobile aur basic tools ka use karke apne products ki professional photos aur videos banana chahte hain. Step-by-step process ke saath diagrams bhi diye gaye hain.

1. Mini Studio Setup

Ek safed ya light background choose karein (white chart paper ya foam board best hota hai). Din ke waqt natural sunlight ka use karein, ya raat me ring light use karein. Mobile ko tripod pe fix karein taake shots steady rahen.

2. Product Photos Ka Tarika

Har product ke 3–5 angles shoot karein: Front, Side, Top, Close-up, aur Lifestyle shot. Natural light ya ring light ka use karein, aur flash avoid karein. Editing ke liye Sapseed aur Canva best hain.

3. Product Videos Banana

Videos 15–30 second ki hon. Product ka use, before/after result, aur features dikhayein. Mobile ko tripod pe fix karein, CapCut/InShot app se edit karein, aur captions add karein.

4. Social Media Friendly Content

Instagram/TikTok ke liye vertical (9:16), Facebook ke liye square (1:1) ya horizontal (4:3) format use karein. Daraz listing ke liye white background aur short demo video best hota hai.

5. Beginner Tools Shopping List

Item	Price (PKR)
Ring Light	1,200–1,500
Tripod	500–800
White Chart Paper / Foam Board	100–200
Poly Mailers	15–25 each

Bubble Wrap	100-150 roll
Free Apps	Canva, Snapseed, CapCut

Tip: Har product ka photo aur video library ready rakhein, isse listing fast banegi aur marketing easy ho jayegi. Consistent quality photos se customers ka trust build hota hai.
